 thalhauzair4@gmail.com  +1(672) 377 1000  Vancouver, Canada  <https://www.linkedin.com/in/thalha-uzair/>

PROFILE

Innovative and adaptable Software Engineer with hands-on experience in Java development, particularly in Spring Boot and API-led development, as well as a strong understanding of microservices architecture. Over 2 years of experience in full-stack web development with expertise in technologies such as React, Redux, Node.js, and relational and non-relational databases. Proficient in CI/CD pipelines, containerization, and Agile methodologies. Proven ability to collaborate effectively in team-first environments, provide technical direction to peers, and take initiative in proposing and implementing application changes to address business needs. Passionate about creating applications that improve user and associate experiences, drive business success, and contribute to organizational growth.

EDUCATION

Post Degree Diploma, Langara College 2023 – 2024 | Vancouver, Canada
Bachelor of Technology, Computer Science & Engineering, 2016 – 2020 | Hyderabad, India
Vidya Jyothi Institute of Technology

WORK EXPERIENCE

Geek Squad Technical support specialist, Best Buy 09/2023 – present | Langley, Canada

- Delivered professional customer assistance, troubleshooting issues and ensuring satisfaction.
- Coordinated appointments and facilitated communication between customers and service teams for timely resolutions.
- Maintained detailed records and collaborated with team members to enhance the customer experience.

Software Engineer | Capgemini, 01/2020 – 11/2022 | Hyderabad, India
Java, Spring Boot, AngularJS, MySQL, Liquibase, CI/CD, Agile/Scrum

- Developed and maintained Shareville, a document and proposal generation platform for Siemens Healthineers, improving efficiency
- Built and optimized Spring Boot services, integrated MySQL with Liquibase scripts, and developed UI components in AngularJS
- Followed Agile principles with CI/CD pipelines, enhancing deployment efficiency by 25%
- Collaborated with cross-functional teams to improve document generation functionality, ensuring seamless business operation

Analyst | Capgemini, Java, Spring Boot, MuleSoft, REST APIs, CI/CD, Design Patterns 01/2020 – 02/2021 | Hyderabad, India

- Achieved MuleSoft Certified Developer (MCD) Level-1 certification after intensive training
- Developed, implemented, and tested MuleSoft integration solutions using Java and Spring Boot, increasing system integration efficiency
- Applied design patterns and testing methodologies to develop and support software based on technical design specifications
- Improved deployment efficiency by 25% through CI/CD pipelines, ensuring high performance and security in system integrations

PROJECTS

PawGuard - Centralized Pet Health Management Platform
React, Redux, Node.js, MongoDB, AWS, REST APIs, TDD, Figma

- Developed a full-stack solution using React, Redux, and Node.js, improving data management efficiency by 40%
- Implemented Redux for state management, enhancing application scalability and performance
- Collaborated with cross-functional teams to gather and implement client feedback via Figma, increasing user engagement by 50%
- Designed and integrated RESTful APIs while following TDD, ensuring high performance and reliability

CleanOps - Mobile Application for Housekeeping Optimization
React Native, Redux, Node.js, Azure MySQL, UI/UX Design

- Developed a React Native app, optimizing hotel housekeeping operations by 25%
- Integrated Redux for state management, improving app efficiency and real-time task coordination
- Enhanced UI/UX based on stakeholder feedback, leading to a 20% increase in task coordination
- Conducted stakeholder demonstrations, showcasing the app's impact on operational efficiency

Favio - Sustainable Delivery Web Application
HTML, CSS, JavaScript, Firebase, Google Maps API

- Built an eco-friendly delivery platform, reducing carbon emissions by 30%
- Integrated Google API for route optimization, increasing delivery efficiency by 25%
- Worked with a cross-functional team to align platform goals with sustainability objectives

SKILLS

Languages & Frameworks: Java, JavaScript, HTML, CSS, SQL, NoSQL, Spring Boot, ReactJS, Node.js, Redux, AngularJS
Backend & Architecture: REST APIs, Microservices, XML, JSON, MVC Architecture
Databases & Tools: MySQL, NoSQL, MongoDB Oracle, SQL Server, JIRA, Confluence
Testing & DevOps: Jenkins, Maven, CI/CD Pipeline, Unix/Linux Environme
Tools & Platforms:: Git, Jira, Anypoint Studio
Cloud & Integration: Jenkins, AWS, CI/CD Pipeline, Mulesoft, API-led Development
Other Skills: Agile Methodologies, Mulesoft, API-led Development, Version Control Systems, linux/Shell Scripting

CERTIFICATES

Salesforce Certified Mulesoft Developer
